PROFESSIONAL SUMMARY

Entry-level Data Analyst with an M.Sc. in Biophysics & Bioinformatics and four end-to-end projects across **SQL, Python machine learning, cloud ETL, and Power BI/DAX**. Architected a Shopify → Fivetran → Snowflake → Power BI cloud pipeline — diagnosed a silent revenue double-counting defect, removed 85 hidden tables, and built 10 custom DAX measures. Built a churn model (**ROC-AUC 0.843**) on the Telco dataset and a dashboard surfacing **666 high-risk customers worth ~$53.5K in monthly revenue**. Strong data-quality and validation discipline from research roles.

TECHNICAL SKILLS

Core Skills: SQL (MySQL, MySQL server), Python, Excel (Power Query, VBA)
Analysis & Modelling: Pandas, NumPy, scikit-learn, Logistic Regression, Feature Engineering, Statistical Analysis
Visualization & BI: Power BI, DAX, Tableau, Microsoft Fabric
Data Engineering: ETL Pipelines, Fivetran, Snowflake, Data Cleaning & Validation

INDEPENDENT PROJECTS | AUG 2024 – PRESENT

Customer Churn Analysis- Python, SQL, Power BI, ML github.com/A4956/Customer-Churn-Analysis

- Cleaned **7,043** telecom records in Python and **ran 25 MySQL queries** (CTEs, window functions, CROSS JOIN benchmarking) that identified month-to-month contracts (42.7% churn), electronic check payments (45.3%), and fiber optic without support services (41.9%) as the strongest churn drivers.
- Trained a class-balanced logistic regression (**ROC-AUC 0.843**; 62.7% of High-risk customers churned vs. 6.7% of Low-risk) and built a 4-page Power BI dashboard with 8 DAX measures listing 666 active high-risk customers worth **~53.5K monthly revenue.**

Shopify Cloud ETL Pipeline github.com/A4956/MY_ETL_PIPELINE

- Built an automated sales reporting pipeline from a Shopify store (30+ products, 20+ orders) to a multi-page dashboard covering revenue trends, retention, top products, and geography (Shopify API, Fivetran, Snowflake, Power BI).
- **Fixed double-counted order revenue** caused by Shopify's line-item schema, restoring accurate reporting (DAX: SUMX, CALCULATE); **removed 85 hidden date tables** to cut model bloat.

Hospital Chain Performance Analysis github.com/A4956/Hospital_Chain_Performance_Analysis

- Flagged **Surgery as the chain's critical bottleneck (37.4-day average stay, 36.6% extreme-severity rate)** despite its lowest patient volume, using a department risk-scoring model (MySQL: CTEs, RANK, PERCENT_RANK).
- Validated **318,438 admission records across 32 hospitals** (zero nulls and duplicates confirmed); built 2 views, a stored procedure, and an audit trigger; delivered 3 recommendations in a live dashboard (MySQL, Power BI).

Uber Bookings Analytics Dashboard github.com/A4956/Uber-Bookings-Analytics-Dashboard

- Delivered a **6-page report on 150,000 bookings with 14 DAX measures**, including Booking_remove_status_filter for correct donut-chart denominators (Power BI, DAX).
- Removed duplicate visuals and freed chart space using field parameters (Month/Quarter, cancellation reasons) and bookmark-driven Show/Hide panels on all 5 pages (Power BI).

RESEARCH EXPERIENCE

Research Intern, Amity Institute of Biotechnology, Kolkata Mar 2024 – Aug 2024

- Validated reproducibility across all runs by applying statistical analysis to TGF-β effects on ARID3A, THAP11, ARID5A, and fibronectin expression; kept Excel datasets clean with validation rules and de-duplication checks.

Research Intern, Bose Institute, Kolkata Jun 2023 – Aug 2023

- Unified outputs from **5 molecular docking platforms across 108 runs** into traceable Excel datasets and ranked binding-affinity results using statistical scoring.

EDUCATION

M.Sc. Biophysics, Molecular Biology & Bioinformatics, University of Calcutta 2024

B.Sc. Botany (Hons.), University of Calcutta 2022 | 78.12%

CERTIFICATIONS & ADDITIONAL

Data Analytics with AI (PW Skills x NSDC x PwC) | SQL and Relational Databases 101, IBM Skills Network (Sept 2026) | Data Analytics & Forensic Technology Simulation, Deloitte Australia (Forage)
Languages: English, Hindi, Bengali | **Leadership:** Event Coordinator, Gurudas College (2020–22)
